CEAG ExLin

LED linear fixtures for hazardous areas

EATON

Powering Business Worldwide

Introducing CEAG ExLin

A linear LED engineered for use in Zone 1 and 21 hazardous areas.

CEAG ExLin delivers longer life, improved efficiency and superior performance with a competitive payback vs. fluorescent fixtures.

The following CEAG ExLin models will replace 2x18W, 2x36W and 2x58W fluorescent fixtures

Model	Typical lumens with clear glass lens	Wattage	Lumens per watt	Equivalent fluorescent luminaire	Typical energy savings / lifetime
ExLin 3L-1	2,750	22 W	125	2 x 18 W	> 40%
ExLin 5L-1	5,300	44 W	120	2 x 36 W	> 40%
ExLin 5L-2	5,480	44 W	125	2 x 36 W	> 40%
ExLin 7L-2	8,120	67 W	121	2 x 58 W	> 40%

Applications:

- Designed to provide general illumination where moisture, dust, corrosion, and extreme temperature exist
- Areas requiring frequent on-and-off of lights
- Oil and gas refineries, petrochemical facilities, food and beverage facilities, platforms, loading docks, tunnels, outdoor wall and stanchion mounted general area lighting, and where flammable vapors and gases are present.

Why CEAG ExLin LED?

Safe, reliable, efficient. CEAG ExLin fixtures combine state-of-the-art LED technology with optimised thermal management and a time-tested enclosure to extend service life in extreme environments.

Superior performance and efficiency

- Replaces 2x18W, 2x36W and 2x58W fluorescent fixtures
- Rated life of 100,000 hours at 25°C based on L90C5 provides long term, low-maintenance operation
- Up to 120 LM/W provides up to 40% energy efficiency compared to traditional fluorescent fixtures
- Operating temperature from -40°C to +55°C

Optimised light distribution with optics and lens options

- Standard, narrow and wide beam optics optimise light distribution, providing light where the customer needs it with the potential to reduce the number of fixtures required
- Clear or diffused (frosted) lens available in glass provides application flexibility
- Optional laminated glass lens with extended plastic foil prevents glass from falling - ideal for safe use in critical processes in food and beverage, chemical and pharmaceutical applications

Low profile and lightweight design with drop in mounting compatibility to CEAG eLLK fluorescent

- Decreases footprint in confined applications and reduces installation effort
- Same fixing point as eLLK 2x18W fixtures and a mounting kit available allowing for easy replacement of 2x36W and 2x58W without changing cables

Emergency lighting function with central battery system

Also available with V-CG-S functionality:
Save and reliable lighting by EATON central battery system

- 25%, 50% or 100% light output in emergency lighting mode freely selectable for each single light fitting
- for a long emergency lighting duration due to optimized use of battery capacity

State-of-the-art LED technology coupled with a long history of hazardous area lighting design expertise

- LED light strings operate independently. Should one string fail, all other strings will continue to work, avoiding complete loss of illumination
- Enclosure material is time-tested and field-proven for durability in harsh and hazardous applications globally
- Optimised thermal management for extending service life in extreme environments
